Security & AV distribution

Award-winning Security & AV distribution from CIE

CIE-Group is one of the UK's leading Security & Audio Visual distributors, supplying installers and integrators with professional security, access control & AV products from key brands including 2N, Akuvox, dormakaba, InterM, Carson, Volo, STid, SAFR, Freevolt, Quanika and many more.

A new way of thinking for Security & AV distribution

Established back in 1964 as a specialist audio and electronics distributor, CIE has become one of the most vibrant and innovative professional Security & Audio Visual distributors in the UK.

As a true 'value-added' distributor, providing our customers with exemplary products and service is the key to our success with a team of true experts in product, specification, design and integration.

We focus on providing comprehensive full-service distribution, including UK-based stock, service and technical support, together with our unique system consultation and build team, allowing us to respond to every aspect of the system design brief.

We pride ourselves on the quality of our people. You'll find that we're enthusiastic, innovative and uniquely knowledgeable and will always endeavour to go the extra mile for our customers and your clients.

End-to-end project support for Security and Audio Visual Systems

CIE is a whole lot more than simply a 'box-shifting' distributor and is a pioneer in the Security & AV industry for value-added distribution. We understand that to compete in this market our customers require the very highest standards of service & support with products and projects.

Total System Support for your Security or AV project

CIE's award-winning team of system integration experts provides a unique total project management service to the UK installer/integrator market.

Our Security & AV experts offer a wide range of added-value services - above and beyond the expectations of many other distributors including; System Design, Product Specification, Wiring Diagrams, Rack Design & Build, System Configuration, Training and Onsite/Remote System Support.

Our customers can access any or all of these services - many of which are totally free-of-charge - on a project by project basis; benefitting from increased skill levels, specialists in new technologies & integration or simply to increase your resource for pre- and post-sales support.

Akuvox Smart Door Intercom & Access Control

Akuvox provides a comprehensive range of professional IP door intercoms, door answering panels and telephones.

Combining state-of-the-art communication & AI technologies with industry-leading innovation, Akuvox has developed a product range to meet the diverse needs of both commercial and residential door intercom and access control applications.

From secure, cost-effective basic door entry devices to the most advanced digital intercom panels with facial recognition, Akuvox IP door intercoms provide a genuine alternative in this fast developing security category.

IP Door Intercoms

Intercom systems for secure high-quality communications.

IP Answering Panels

Luxury audio and video door intercom answering panels that fit into every interior.

IP Access Readers

Professional-grade products for both commercial and residential access control.

IP Telephones

VoIP technology for transmitting telephone calls over an IP network.

2N - the award-winning brand for professional IP connected door intercoms and access control equipment.

2N IP Intercom & Access Control Systems

2N's innovative range of IP Intercoms, Door Answering Panels and Access Readers utilise the very latest security and identification technologies, to deliver a multi-award winning range of professional security products.

IP Door Intercoms

Intercom systems for secure high definition communications.

IP Access Readers

Professional-grade products for both commercial and residential applications.

IP Answering Panels

Luxury audio and video door intercom answering panels designed to fit into every interior.

STid

STid specialise in bespoke technology solutions. With their legacy spanning over 25 years, STid have consistently innovated and provided intelligent solutions aimed at enhancing access security and ensuring industrial traceability in challenging environments such as aeronautics, energy and defense.

STid are committed to staying at the forefront of technology enabling them to utilise the latest advancements in securing digital identity. They have helped empower businesses, industries and governments to identify, protect and monitor their assets, contributing to a simpler and safer daily life.

IP Access Readers

Automatically paired readers and credentials - without worrying about configuration or encoding.

Smartphone ID Readers

A wide range of upgradeable readers, compliant with all RFID MIFARE chips and NFC mobile credentials.

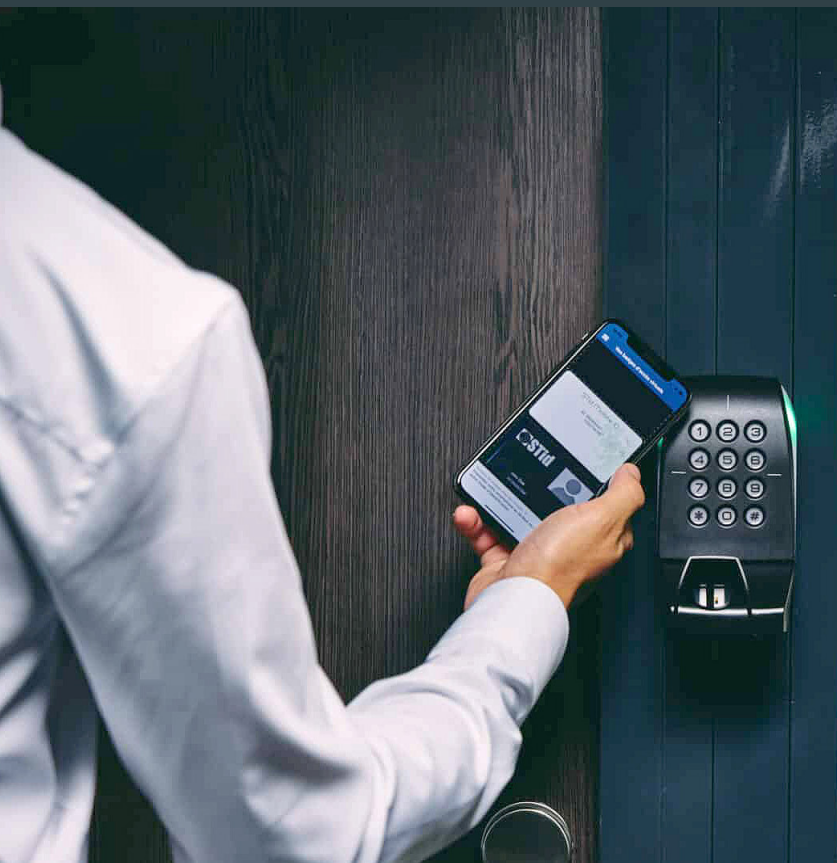

ATEX Certified Readers

ATEX & IECEx certified proximity and long range readers for applications in explosive environments.

Hands-free & Vehicle Access

Long-range readers & credentials for driver and vehicle identification and access control.

Farpointe Data

Farpointe Data's mission is to provide extremely reliable RFID products and options for value-added solutions at highly competitive prices. Since 2003, Farpointe Data has offered security professionals a selection of premium OEM contactless identification solutions—both standard and custom—based upon their own 125-kHz proximity, 13.56-MHz smartcard, 433-MHz long-range and 2.4-GHz mobile technologies.

Smartphone ID Readers

Farpointe Data's mobile smartphone ID solution consists of a smartphone wallet app, mobile and physical credentials.

Long-range Receivers & Transmitters

Farpointe Data long-range receivers & transmitters offer exceptionally long transmission distances up to 61 metres (200ft).

Freevolt S-KEY is the next generation of fingerprint activated access control with this advanced biometric entry solution.

Freevolt S-KEY

By embedding high security fingerprint reader technology within the credential card itself, S-KEY allows existing access reader systems to be 'upgraded' to multi-factor, biometric authentication without altering the readers or access control infrastructure.

Fingerprint Biometric Access Control Cards

Multi-factor, biometric fingerprint reader credentials embedded within the smart card.

SAFR SCAN is a high-performance face recognition access reader from Real Networks.

SAFR

Embrace the future of access control with SAFR SCAN, where your face becomes your ultimate credential. Unlike legacy access control authentication methods such as cards and key fobs - which are prone to loss, theft or replication - face recognition authentication offers unmatched security and efficiency.

Traditional credentials, including PIN codes and ID cards, have their limitations. SAFR SCAN revolutionises identity authentication by harnessing the power of face recognition, proven to be the superior choice for security, speed and flexibility. Experience top-tier security and operational efficiency with SAFR SCAN, setting new standards in access control technology.

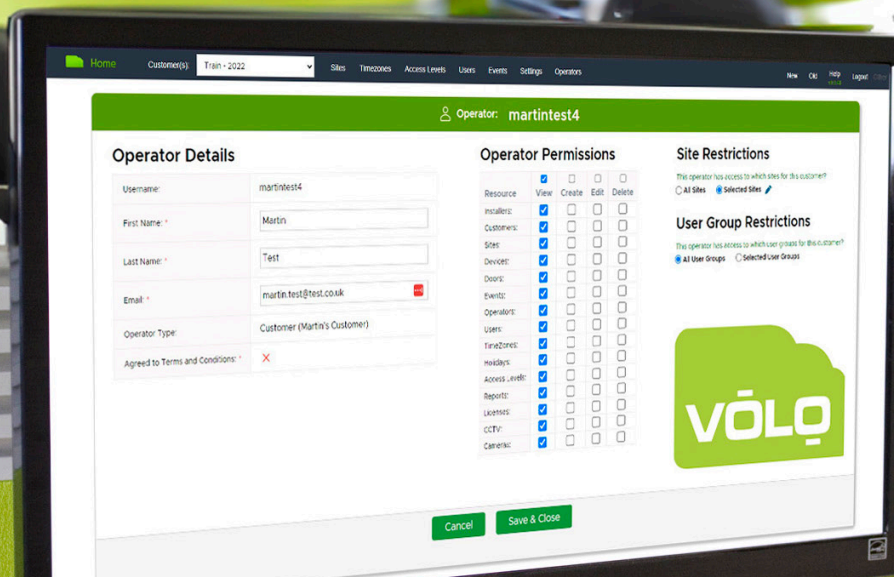

High-performance face-recognition access readers

High-speed access and authentication, harnessing the very latest in biometric credentials.

VOLO Access Control system combines cloud hosting and GSM/GPRS connectivity.

VOLO Cloud Based Access Control

VOLO provides a new way of delivering access control solutions. Through the integration of Cloud Hosting and GSM/GPRS connectivity, you gain access to a robust and adaptable system that enables the delivery of proactive solutions. This not only decreases installation times and hardware expenses but also provides increased flexibility, scalability, and enhanced service delivery for your clients.

- **Powerful Scalability:** Capability to scale seamlessly from managing access for a single door to overseeing operations across over 10,000 sites and accommodating up to 100,000 users.
- **No Local PC Required:** Eliminates the need for a local PC on-site, resulting in space savings and a reduction in maintenance risks and hardware investments.
- **Mobile GPRS Connectivity:** Enables connectivity through Mobile GPRS for sites without a convenient LAN or internet connection.
- **Multi-Access Levels:** Offers 256 access levels, providing integrators and end-users with extensive multi-user access rights for site and system programming privileges.
- **Access From Anywhere:** Accessibility from any location via supported browser devices, including smartphones and netbooks, ensuring convenience and flexibility.

Quanika

Combining power with practical simplicity, Quanika software solutions provide uncompromising performance across single and multiple sites.

Quanika Unified Security Management Platform

Quanika is a global software house that transcends the challenges of accumulated complexity, by simplifying systems and delivering on the promise of integration to deliver complete, end-to-end security and safety solutions. Quanika Enterprise and VisitorPoint unify enterprise-class access control and next gen visitor management with popular databases such as Microsoft Active Directory to eliminate technology stacks and streamline workflows.

Modular and scalable, Quanika software seamlessly integrates with Axis Communications technology including VMS, network controllers, cameras and audio devices – as well as other third-party security devices from names including 2N, Assa Abloy, Akuvox and HDI – allowing customers of any size to manage security and safety operations with clarity - from one easy-to-use, 'single-pane-of-glass' platform.

Carson Living provides 24/7 Remote Doorman and Virtual Concierge Service in a One-App Resident Experience.

Carson Living 24/7 Remote Concierge & Resident App

Harnessing mobile and virtual technology, the Carson Living one-app resident experience and 24/7 remote doorman service integrates with many leading IP access control, video monitoring and online payment brands and has already taken the US MDU and multi-family building sector by storm.

Carson enables instant and streamlined property management in unmanned buildings and communication between residents, staff & management, as well as providing a 24/7 remote concierge support centre. Carson integrates with your existing hardware, while syncing with your property management software.

24/7 Parcel Delivery Acceptance

24/7 remote doorman service ensures deliveries will always safely enter the building.

Access Control & Visitor Management

Use the Carson app's integrated video intercom and electronic key to open doors for authorised guests and vendors.

Access & Security system integration

Carson integrates with major intercom, access control, electronic apartment door lock and camera systems.

Communication & Payments Platform

Instant and streamlined communication between residents, staff and management for payments, messaging and support updates.

dormakaba is a leading global provider in access solutions including door hardware, digital access and lock systems for residential, MDU and hospitality sectors.

dormakaba Access Control & Door Entry

The latest addition to the CIE access and security product range, dormakaba provides a wide range of IP connected, smart access and door hardware solutions which further increases our offering for fully-integrated contactless pathways through the building.

Electronic Access & Data

Intercom systems for secure high-quality communications.

Door Hardware

Range of door closers, locks, door furniture and emergency exit hardware for build longevity and compliance – all from a single source.

Mechanical Key Systems

Professional-grade products for both commercial and residential access control.

Gates & Barriers

A wide range of gates & barriers tailor-made for your application.

interM

The Industry Standard.

Inter-M – one of the world’s leading brands for commercial and professional audio equipment.

Inter-M Professional PA & Audio Systems

Having worked together for over 25 years, CIE is recognised as one of the most successful Inter-M supply partners in the world.

Over this period, Inter-M’s Professional Audio product range has been specified into many of the UK’s leading system installations across the full spectrum of commercial and private sectors; resulting in its enviable reputation as ‘The Industry Standard’ for installed sound.

Within many of the retail sector’s largest high street and supermarket chains, banks, building societies, airports, places of worship, hospitals and education, you’ll find high quality, trusted PA and AV systems powered by Inter-M.

Audio-over-IP

Professional audio distribution over IP network for site-wide & multi-site systems.

Amplifiers

100v line and low impedance mixer and power amplifiers.

Processors & Mixers

Audio signal distribution and sound control for professional audio systems.

Loudspeakers

A wide range of professional loudspeakers for voice and music production including ceiling, column, horn & music speakers.

Opus Technologies

Opus Technologies offer state-of-the-art assistive listening systems that incorporate cutting-edge technology. Utilising various technologies, Opus design and produce a diverse range of solutions to cater to specific needs in various scenarios. The product range is dedicated to inclusivity, enhancing accessibility, and ultimately elevating customer satisfaction by creating accommodating environments.

Hearing Loop Amplifiers

A wide range of professional, Class D Hearing Loop Amplifiers for installed assistive listening systems.

Counter & Small Area Induction Loop Systems

Portable induction loop systems for flexible assistive listening support where and when it's needed.

Window Intercom Systems

Opus window intercom systems allow clear, two-way communication through barriers such as security screens, windows and mask barriers etc.

Intelligent critical communication solutions through intercom, IP Audio & Public Address and Voice Alarm technologies.

Zenitel

Zenitel is a leading provider of intelligent Critical Communication Solutions, enabling everyone to hear, be heard and be understood. Zenitel's Safety and Security business unit primary system offering is within Intercom, Public Address, Voice Alarm and IP Speakers. Recognised globally for offering state-of-the-art communication solutions which deliver the interoperability you need and the reliability you demand.

IP Audio & Public Address

A complete range of professional public address & IP loudspeakers combines the innovation Zenitel IP technology and recent acquisition ASL's enviable knowledge and experience of the PA/VA sector.

Voice Evacuation

Modular design, built-in redundancy and great flexibility are key to the Zenitel range of EN54-certified voice evacuation systems.

IP Intercoms

Zenitel provides a complete range of commercial and industrial-grade intercoms designed to resist high impact and extreme weather conditions.

So much more than your average Security supplier!

With more than 50 years experience in the audio visual and electronics industries, CIE is regarded as one of the leading and most innovative AV & Security distributors in the UK.

As a true 'value-added' distributor, providing our customers with exemplary products and service is the key to our success, with a team of true experts in product, specification, design and integration.

CIE specialises in the four key product groups of Intercom/Access Control, Audio Visual, Connectivity and Test Instrumentation and as the tier 1 UK distributor for many leading brands in these markets, we work in partnership with manufacturer and installer to meet the exact needs of individual projects and market trends.
