Nocturne

A private members bar, conceptualised and owned by the highly creative UK band Massive Attack, Nocturne has a very stylish and 'laid back' look and feel.

As a band always promoting new ideas and technologies, the use of Amina Acoustic Panels in the club gave a new dimension to the sound system.

Based in a relatively small environment, space was a serious consideration as was the aesthetics of the speaker system. The solution to use a combination of Picture and Screen Panels provided high end music with only a very small amount of space taken up by the speakers. To add to the 'nocturnal' styling of the club, all panels were finished in 100% black leather which had little or no effect on the output of sound.

Nocturne

- Bristol, London

Business:

Private Members Bar

Product:

Leather Covered Amina Screens & Picture Panels
